

May their memories be blessed.

AN INSPIRIT SIGNATURE PROGRAM

EVERY
65
SECONDS

Every 65 seconds someone in this country is diagnosed with Alzheimer's or a related dementia.

That's more than 6 million Americans living with Alzheimer's. Alzheimer's disease is the most common form of dementia.

At Inspirit, daily programming encourages participation in activities that are meaningful and bring purpose to one's life. Residents also have the opportunity to connect with others living with dementia.

THE MISSION

Honoring the resident by creating meaningful interactions, in safe hands. Working within their memories and abilities. Where living your best day today is our most important goal.

THE PEOPLE

Dedicated and Sage trained employees and families. Compassionate care, where residents and their families are valued.

THE SUPPORT

On-going training along with family meetings and gatherings.

THE PROGRAMMING

Structured and routine, creating a familiar environment. Finding out what was meaningful to each resident, what brought joy to their lives.

*"Knowing that we make **Living Your Best** a reality everyday, creating environments that cherish the memories of our resident. It's an honor creating meaningful interactions in safe hands."*
